Cancer survivors get more help, doctors say

By عشره وعشرون

Atlanta Cancer patients can get more help in the future, according to doctors, because of an increase in research and better treatment. Dr. William T. Mayo, president of the American Cancer Society, said there are now more than 1.5 million cancer patients in the United States, and that a new disease that affects the body's cellular tissue and organs. The finding was made after a series of studies conducted by the Mayo Clinic and other leading institutions.

The finding was the result of a study conducted by Dr. William T. Mayo, president of the American Cancer Society, who said that a new disease that affects the body's cellular tissue and organs. The finding was made after a series of studies conducted by the Mayo Clinic and other leading institutions.
